Modern Sustainable Home with Panoramic Nature Views –

Santa Cruz, Aruba

Experience modern island living in this exceptional sustainable home, nestled in the peaceful and

scenic neighbourhood of Santa Cruz, Aruba.

Built in 2020, this contemporary residence sits on a generous 2,297 m2 parcel of property land,

offering privacy, space, and uninterrupted views of Aruba's beautiful natural landscape.

Designed for both comfort and sustainability, the home features solar panels and a solar water

heater, significantly reducing energy costs while supporting an eco-friendly lifestyle.

Constructed using the innovative RSG-3D building system, this home combines cutting-edge

technology with outstanding quality and durability. The precision-engineered construction

minimises waste, delivers excellent energy efficiency, and meets modern building standards. In

addition, RSG-3D construction offers enhanced fire resistance and increased resilience against

hurricanes and high winds, providing long-term security and peace of mind.
